## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed 9/1/2004 has been considered, the lined through references have not been considered because the required dates have not been provided.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the positioning of the sling with respect of the pubic bone, descending rami and bladder must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 - it is unclear how the sling secured between the descending rami as set forth in claim 8 has sling material between the pubic bone and the descending rami as set forth in claim 10.

Claim 11 - the bone anchors are located in the pubic bone then the anchors are loaded into an inserter device and deployed into a ligament. It is clear that the same anchor cannot be in the pubic bone and the ligament but as written it is unclear what anchors are being referred to and appears that the bone anchors need to be in two places at once.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Trip et al (6,197,036 hereinafter Tripp).

Claim 8 - Tripp teaches placing a sling under the bladder to treat cystocele. The sling may be anchored to a plurality of locations as set forth in, column 9 lines 46-54 and column 8 lines 20-27. In a preferred method the anchors are positioned in the tubercle portion of the pubic bone. It is the examiner's position that the preferred embodiment does not limit the teaching of the reference and the bone anchors may be placed in any portion of the pubic bone including the descending rami.

Claim 9 - the material for the sling can be natural or synthetic as set forth in Column 5 lines 9-35.

Claim 10 - the sling is positioned under the bladder and anchored to the pubic bone therefore the sling is inherently between the pubic bone and the pubic bone rami.

***Allowable Subject Matter***

Claims 11 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or fairly suggest a method as claimed including treating cystocele by placing a sling under the bladder and using anchors in both the pubic bone and an anchor in a ligament to secure the sling.
